GAONGREEN | SUSTAINABILITY ASSESSMENT

ESG Assessment Report

Example Exporter Co.

Reporting year: 2025

Prepared using GaonGreen K-ISSB Reporting Wizard

Data completeness	Scope 1 + 2 emissions	Total energy
48%	420 tCO_2e	4,100 GJ

Renewable electricity share
25%

Reported data coverage

Data completeness	48%
Renewable electricity share	25%

Completion measures fields provided, not compliance.

ESG reporting dashboard

Missing information

Energy and emissions

- Grid emission factor (optional estimate)

Water and waste

- Water withdrawn
- Waste generated
- Waste recycled or reused

People

- Female employees
- Employees who left
- Work-related injuries

Governance, strategy and targets

- Who oversees sustainability?
- Key sustainability risks and opportunities
- How are sustainability risks managed?
- Targets and progress

Calculated indicators

Indicator	Value	Unit	Note
Total Scope 1 + 2 emissions	420	tCO_2e	
Scope 2 emissions used	300	tCO_2e	Entered value
GHG intensity per revenue	0.08	tCO_2e / KRW million	
GHG emissions per employee	4.2	tCO_2e / person	
Total energy	4,100	GJ	
Energy intensity per revenue	0.82	GJ / KRW million	
Renewable electricity share	25	%	
Water intensity per revenue	Missing	m^3 / KRW million	
Waste recycling rate	Missing	%	
Female workforce share	Missing	%	
Employee turnover rate	Missing	%	
Injuries per 100 employees	Missing	cases

Metrics and targets — Calculated indicators

Total Scope 1 + 2 emissions: 420 tCO_2e; Scope 2 emissions used: 300 tCO_2e; GHG intensity per revenue: 0.08 tCO_2e / KRW million; GHG emissions per employee: 4.2 tCO_2e / person; Total energy: 4,100 GJ; Energy intensity per revenue: 0.82 GJ / KRW million; Renewable electricity share: 25 %; Water intensity per revenue: Missing m^3 / KRW million; Waste recycling rate: Missing %; Female workforce share: Missing %; Employee turnover rate: Missing %; Injuries per 100 employees: Missing cases

Preliminary working draft; review reporting boundaries, materiality, methods, evidence and applicable requirements before publication.

Methodology and limitations

This is a preliminary, self-reported ESG data summary. Figures are calculated from the entries supplied by the company. Scope 2 can be estimated from electricity and the entered grid factor if no Scope 2 value is supplied. The tool does not validate supporting evidence, determine materiality, provide assurance, or certify K-ISSB compliance.
